Comments: (If possible, please reference section number and/or page number in document if applicable.)

1 I believe from past knowledge and experience  
with hazardous wastes that transportation of  
same is a very weak part of the disposal problem.

There is no safe transportation system available  
that will protect the public. I've seen too, too many  
mishaps in this regard.

2 Hazardous wastes of nuclear and radioactive nature  
should be 100% safely disposed on the site of  
origination, or else safely stored on-site of origin  
until they can be safely recycled or otherwise  
neutralized.

3 Yucca Mtn or similar sites are unacceptable  
AJ Vandenberg 12/26/99

Please note: For your comment(s) to be considered in the Final Environmental Impact Statement, your comment(s) need to be received by the Department of Energy by February 9, 2000. To the extent practicable the Department will consider comments received after February 9.

Please feel free to attach additional pages; more postage may be needed. If you prefer to mail your comments, you may use the back side of this sheet as a postage-paid, self-mailer. To do so, fold in thirds along the dotted line so address and postage-paid notice are visible; then secure with tape.
